

ARENA

Immersive projection

SCREENLINE
the screen makes the difference

CLASSIC VERSION

ARENA is the **highly customizable** cylindrical screen for total immersion projections. The cylindrical shape makes it possible to obtain a visual surface which surrounds the onlooker, transmitting the feeling of being totally immersed in the virtual projected environment.

A custom-made solution realized depending on the customer's requirements.

Dimensions range available **from 4.50 m to 24 m diameter** and a curvature variable from 30° and 360°, according to the need and to the project.

Available customizations:

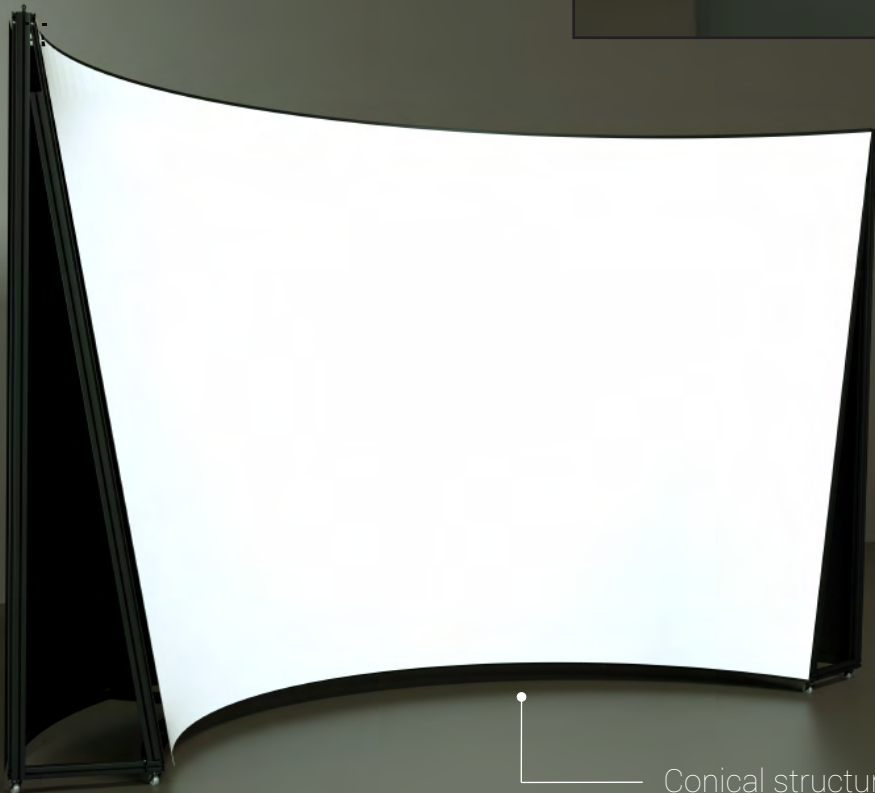

- Conic version
- Videoprojectors structure
- External cover
- Printed external cover
- Top cover
- Bottom drop
- Door, in case of 360° (in black or white)
- Eyebolt brackets
- Roller feet
- Telescopic feet

CONICAL VERSION

For an even more immersive effect and for particular installations it is possible to create Arena with a conical structure.

Eyebolt
brackets

Conical structure

Roller feet

Telescopic feet
