**Fast** New frame with arrow borders. Easily installed thanks to the snap-on fabric positioned inside the dedicated groove, replacing the slow installation of the old eyelet frames.

**Smart** 5 fixing grooves allow coping with the stretching and shrinking of the fabric.

**Clean** No more spots or abrasions on the fabric. Now the placement of the fabric is made side up.

# New Big Frame

## Choose the right temperature rail

Thanks to a more robust frame, New Big Frame easily reaches remarkable sizes. Frame and arrow shape/borders form a black frame, front fabric screen which is quickly installed, regardless the changes in climate. The 5 parallel grooves, in fact, allow the frame to adapt to the typical stretching and shrinking of the PVC (+/- 10,4 cm).

# OnlyWhite

## Fast, smart, clean and **so beautiful**

The frame and the arrow borders fabric grant the same qualities as New Big Frame. Fast and clean installation remains an absolute prerogative of this new screen even though its main quality is beauty. Simply white, perfectly flat and clean, it stands out for its elegance and harmony in any application, satisfying the requirements and tastes of the most demanding client.

# Add & Shape

## Cube & Polyhedrons

The true innovative aspect of this new family of screens is versatility. Thanks to two specifically designed accessories, it is possible to combine one screen with another in order to create structures and configurations able to fit any architectural need.

The arrow borders eliminates the use of eyelets, hooks, buttons and rubber bands, ensuring a non corrugated, flat surface, with the screen perimeter line perfectly straight.

The assembling of several OnlyWhite screens frees your creativity even

## Wallet

more, allowing the design of cubical, hexagonal, wallet-shaped, complex configurations and many more.

Museums, art galleries, multifunctional structures or exhibition booths can now rely on a valid tool to create the most artistic sceneries. The design of the frame profile makes it possible to turn the screens into decorative panels by placing a rigid panel or a pre-decorated fabric in the dedicated groove.

# Supports

## Angle

Easy and safe installation.  
Rounded corners.

## Wall brackets

Made of aluminium, they allow wall fixing for permanent and semi-permanent installations.

## Eyebolts

Made of stainless steel, they are suitable for steel chains or other supports for installations on truss or other structures.

## Aliscraf clamps

Made of steel or aluminium, they are suitable for fixing to truss-like structures.

## Legs

Adjustable steel legs, useful in installations where the screen is placed on the floor.

## Fabrics

Only your fantasy could be a limit.
