	Canna	95 %	5 %	30 %	65 %	0,42
	Gelsomino	88 %	14 %	75 %	11 %	0,22

## Thermal performance

Fabric excludes up to 91% of incoming heat to maintain a stable interior temperature in summer without increasing air conditioning requirements. This enhances user comfort and building energy performance.

## Visual comfort

Fabric maintains outward views and uninterrupted natural light while protecting from glare.

## Acoustic performance

Fabric reduces reverberation, thereby improving the occupants' acoustic comfort. The fabric absorbs up to 45% of the noise within a 100 mm air gap.

Acoustic absorption:  $\alpha_w = 0,40$  (LA=100mm)

## Fire safety

Fabric meets international standards for fire rating standards and does not contribute to flashover.

## Health safety

Fabric is guaranteed totally phthalate-free. It is certified Greenguard Gold, proving the fabric complies with the most stringent indoor air quality standards. It therefore contributes to creating a healthier interior.
