

ITR PRO

Immersive training room

Immersive

Finger touch

Rewritable

Custom graphics

Immersive, interactive 3x3x3 cube screen.

Free-standing, stable and sturdy. Aluminum frame, screens in HPL.

Immersiveness and interactivity

Specific for museum and corporate environments where you want to recreate a highly immersive and multisensory environment. Interactivity allows the viewer to interact directly with digital content, becoming an active part of the content itself.

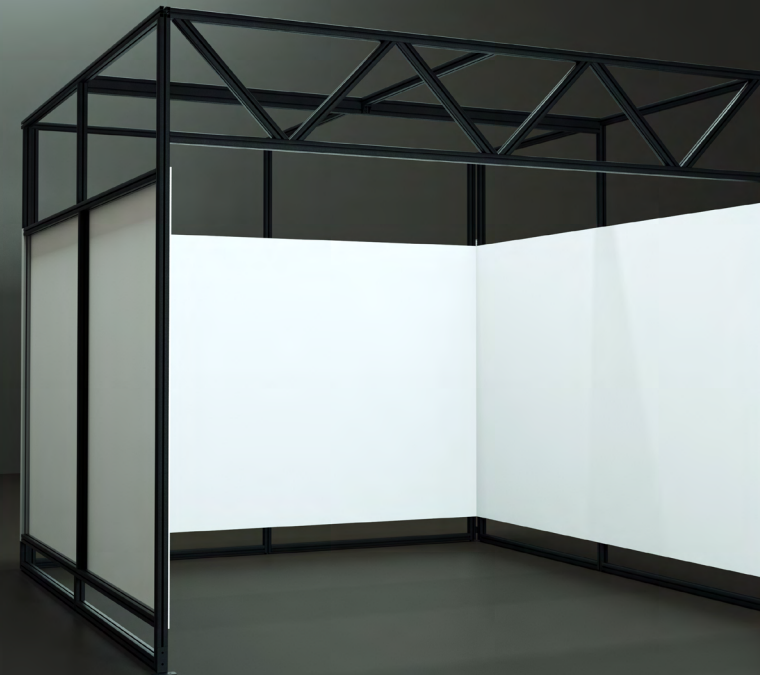

Free-standing

Stable, self-supporting solution that holds projectors and HPL screens for interactive projection. Easy to install and set up, it does not need to ask for a permission to build.

VP UST:

Compatible with 3 Epson EB-735Fi interactive ultra-short optic laser projectors. The brightness is 3,600 lumens, therefore also suitable for bright rooms.

Epson EB-735Fi
