Pentagonal immersive screen

Immersive screen in PVC canvas for museum or corporate environments.

Immersiveness

Specific for museum and corporate environments in which you can recreate a highly immersive and multisensory environment. The pentagonal shape and the width of the screen allow a good viewing area capable of accommodating up to 5-6 people.

Wall mounted or free-standing

The immersive room consists of an aluminium frame and PVC Diamond canvas video projection screens. Available in the version anchored to the wall or self-supporting with 2 stands that can be ordered on request.
