

FASHION

Base from 150 to 400 cm

Fashion – The Classic Fixed-Frame Screen for Permanent Installations  
Fashion is a fixed-frame screen designed for permanent installations, ideal for professional environments and spaces dedicated to high-quality projection.

The frame features a 7 cm rounded inner profile, finished with a matte coating to minimize reflections and enhance the projected image. A perimeter groove and a set of dedicated accessories allow for both wall mounting and ceiling suspension, offering maximum flexibility during installation.

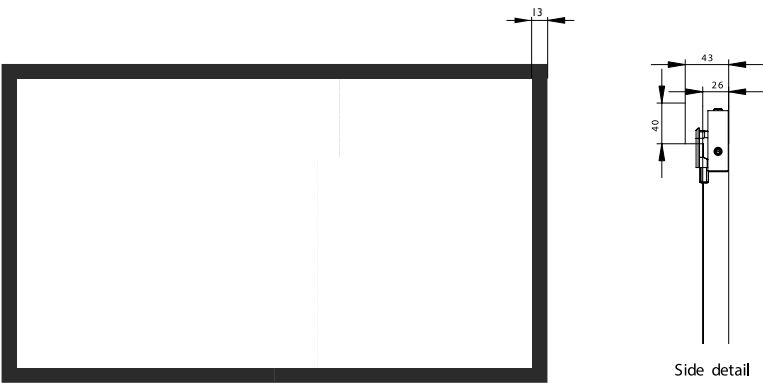

The PVC screen surface is installed from the rear using a rubber-edged border and clips, which become invisible once mounted. This system ensures even tension across the entire surface, resulting in a perfectly smooth screen, free from waves or wrinkles — for flawless visual performance.
